Reg: 2015/019267/07 (Previously CK1996/040224/23)

VAT: 4350160125

MISSION STATEMENT

Our growing Family of **STANDBY POWER SPECIALISTS**, seek to satisfy our **CUSTOMERS** with honest, reliable & well supported solutions. We are committed to developing our **COLLEAGUES** and **COMMUNITY** in ways that strengthen, encourage and uplift.

ABOUT US

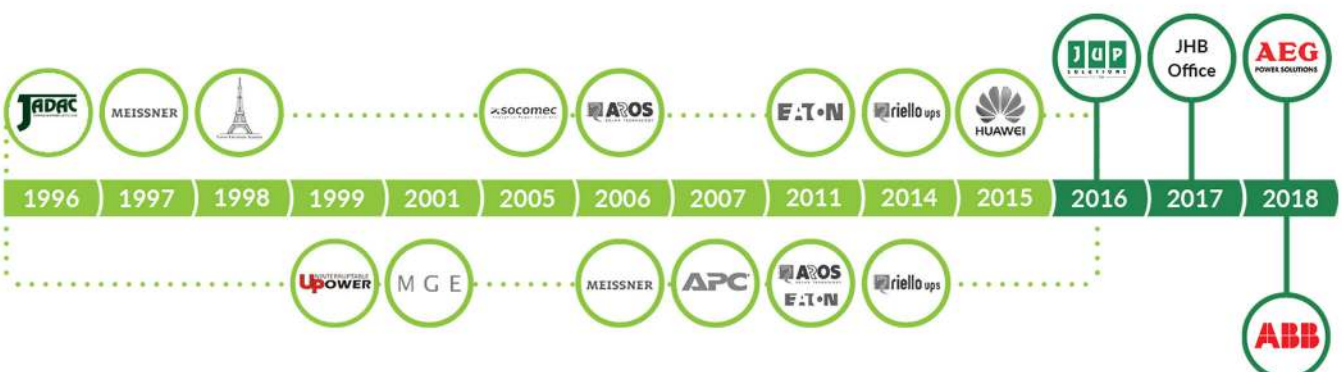

JUP Solutions was formed in 2017 by the amalgamation of **JADAC POWER SUPPORT**, established by MR Johnny Beggs in 1996 and **UNINTERRUPTIBLE POWER**, established by MR Costa Psannis in 1999. It was their belief that by integrating their extensive knowledge in the Standby Power industry and combining resources, they could form a formidable partnership superior to others in this industry.

Both JADAC and Uninterruptible Power stood independently in the Emergency / Backup Power industry for a combination of 39 years and further to this, both Mr Johnny Beggs and Mr Costa Psannis have been in the industry for a combination in excess of 65 years.

JUP Solutions is a Company formed to provide Turnkey Emergency / Standby Power Solutions from concept, through design, implementation and into ongoing maintenance.

We pride ourselves in our ability to provide high quality products at competitive prices, backed by expert after sales service born out of many years of experience and customer satisfaction.

JUP Solutions is the Kwa Zulu Natal sales and support agent for TOWER Electronics and SOCOMEC products. In addition we are a Value Added Reseller for the RIELLO/AROS , EATON/MEISSNER and APC/MGE/Schneider products and have established a position in the market place whereby our association with various other UPS suppliers gives us access to a wide range of products and spares. With this we enjoy the added service and support that these larger suppliers offer.

TURNKEY POWER SOLUTIONS

PROJECT DESIGN

JUPS employs qualified project managers who are able to assist from inception of your project idea, through a needs analysis, power audit, budgeting and then final rollout of your system. We are able to assist with all or any part of your project plan.

INSTALLATION

JUPS technicians are all suitably qualified to successfully consult on or complete the installation of your system. All our workmanship is carried out with the highest level of care and compliance.

REPAIRS

JUPS prides itself in its ability to provide prompt and efficient back-up service born out of many years of experience and fault related queries in the industry. Time is money, and so our goal is to have you back up and running as promptly as possible. JUPS technicians are trained to fault find and repair right down to PC Board level.

MAINTENANCE

JUPS recommends periodic maintenance to ensure the efficiency and reliability of its customer's systems. We are able to offer the highest level of detailed maintenance with comprehensive reports based on the key elements we've identified over the last 20 years of service.

RENTALS

JUPS realises that in our tough economic climate, clients are often limited by budgets and especially large CAPEX expenditures. This is why we offer a fully comprehensive Rental option on any of our products for any rental period.

TURNKEY POWER SOLUTIONS

UPS – AC & DC (Including inverters, chargers, rectifiers, Battery Tripping Units)

An uninterruptible power supply is an electrical apparatus that provides emergency power from a standby battery to a load when the input power source or mains power fails. JUPS offers a variety of ranges from rack mountable, desktop or free standing; Standalone or parallel redundant configurations. No size is too small or too big. If we cannot find you a suitable "off the shelf" product, then let our JHB based factory design and build a unit suited to your application. Further to the supply of UPS units, JUPS prides itself in its ability to maintain and repair the majority of major brands. We have a dedicated Workshop and a team of qualified technicians for your onsite needs.

GENERATORS

A generator is a device that converts mechanical energy to electrical energy for use in an external circuit. Usually coupled with a UPS solution, we have an array of Standby Generator configurations suitable to your application and if not, we'll manufacture it in house specifically to meet your requirements. Open sets, Canopy sets and Sound attenuated sets. All our Generators are built to the highest qualities and safety standards. Added to our ability to manufacture, we have an extensive team of qualified technicians who carry out installations, repairs and maintenance on all makes and models of Generators.

PV SOLAR

Photovoltaic Solar power is the conversion of energy from sunlight into electricity. Solar PV is rapidly becoming an inexpensive, low-carbon technology to harness renewable energy from the Sun. JUPS has been keeping abreast of this fairly New technology and through converting our Head office to Solar power we've gained valuable insight and knowledge into the workings of such a system. JUPS employs project managers educated specifically on Solar Solutions and so speak to us about any of your requirements big or small.

ELECTRICAL

JUPS focuses its electrical efforts around the other products and services it offers. Our team of installers, led by our registered electrical contractor will undertake to assist with or complete any electrical reticulations related to the installation of your Standby Power system. Further to this we carry out electrical audits and Energy saving assessments to advise on how best to structure your environment.

MONITORING

In the techno world we living in, mobility is key to performance and efficiency. JUPS knows that time is of the essence in many critical IT, medical, banking or Industrial applications and so we offer an array of monitoring options which allow you to interrogate, control or just receive alerts from your standby power environment.
